Hyperkinetic Movement Disorders (Current Clinical Neurology)

Hyperkinetic Movement Disorders (Current Clinical Neurology)

Hyperkinetic Movement Disorders is a state-of-the-art resource devoted to disorders characterized by excessive movement. Organized according to specific disorders or syndromes, each chapter is written by a group of internationally recognized experts. Chapters have been organized by the individual authors to best highlight the salient features of the disorders. Each chapter features a video accompaniment that provides highly instructive examples of each disorder, offering clinicians an important video-based tool to aid in making correct diagnoses. The video is on an accompanying DVD and can also be found at www.springerimages.com/Suchowersky. Without a visual evaluation of the phenomenology, diagnosis of the hyperkinetic disorder is fraught with error. *Hyperkinetic Movement Disorders* is a unique and essential new text written for neurologists, psychiatrists, neurosurgeons, internists, residents and all others interested in movement disorders. An invaluable resource, it will lead to a better understanding and recognition of the hyperkinetic movement disorders, and that, in turn, will lead to better care for patients.
