The Galaxy on Earth: A Traveler's Guide to the Planet's Visionary Geography Richard Leviton

Sacred tourism—travel to sites known to have powerful Earth energies or great religious, mystical, or mythological significance—is increasingly popular. But how do visitors even begin to understand what such places are all about, much less tap into the sacred energy, the sense of power, pervading them? Richard Leviton brings together a wealth of information from diverse sources in this unique guide to 50 visionary landmarks: their physical descriptions, history and archaeology, myths and legends, and reports of mystical experiences by actual travelers. Furthermore, Leviton reveals a startling correlation between the energy structures that make up our galaxy, the sacred sites on Earth, and the fundamental structures of consciousness of every human being!

Leviton for the first time not only explains why sacred sites have an effect on human consciousness, but shows how myth, correctly interpreted through metaphysical insight, can be the key to experiencing the sacred energy of a site. The Galaxy on Earth is the one book that today's sacred travelers and ecotourists should not leave home without.
