The Sudden Death Of Michael Jackson (Second Edition): The Coroner's Report And Other Medical Facts About The Causes Of Death Andrew Dolan

Michael Jackson died with six different drugs in his body, and the coroner stated that Propofol intoxication and the benzodiazepine effect produced by Lorazepam were the causes of death. What are the effects of these drugs, and why was Michael Jackson using them the day he died? Why did Michael Jackson start abusing prescription drugs in the first place, and how did years of prescription drug abuse make his death more likely? How could Michael Jackson have avoided death? The nineteen chapters in this book include the complete text of the Los Angeles Coroner's anesthesiology consultation report, their summary of toxicological findings, nontechnical descriptions the drugs that led to Michael Jackson's death, explanations of key medical concepts and over a hundred references from medical, pharmacology and toxicology journals. The upcoming trial of Michael Jackson's doctor will hinge on various types of medical evidence. Those who want to understand the nature and significance of the medical evidence that will emerge during the course of the trial will find that this book explains medical concepts relevant to the death of Michael Jackson using easy-to-understand, nontechnical English that can be understood by readers who do not have a scientific background.
