Integral/Structural Polymer Foams: Technology, Properties and Applications Fyodor A. Shutov

Integral, or structural, foams are one of the most remarkable materials that have been developed over the last fifteen years. As with all rapidly growing fields, the terminology seems to have grown even faster. Thus there are two names for the material structure itself. In the United States and in Japan the term for these plastics is Structural Foams, whereas in Europe and the USSR the term used is usually Integral Foams. We have adhered to the European term in the text and hope our colleagues will bear with us. Integral foams have a specific structure: a cellular core that gradually turns into a solid skin. The skin gives the part its form and stiffness, while the cellular core contributes to the very high strength-to-weight values of the material. These are higher than those of some unfoamed plastics and metals. The sandwich-like structure with its unique mechanical properties was prompted by nature. Wood and bone are strong and light-weight natural materials having a cellular structure. Since the sandwich-like structure of the integral foams resembles that of natural wood, the foams are often referred to as artificial wood or plastic wood, thereby emphasizing not only the formal structural similarity of these materials, but also one of the main functional applications of integral foams - replacement of wooden articles in various fields of engineering and construction.

From reader reviews:

Toni Bays:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to know everything in the world. Each reserve has different aim or even goal; it means that book has different type. Some people feel enjoy to spend their time to read a book. These are reading whatever they consider because their hobby is reading a book. How about the person who don't like reading through a book? Sometime, person feel need book when they found difficult problem or exercise. Well, probably you will require this Integral/Structural Polymer Foams: Technology, Properties and Applications.

Robert Carroll:

Do you among people who can't read satisfying if the sentence chained within the straightway, hold on guys this kind of aren't like that. This Integral/Structural Polymer Foams: Technology, Properties and Applications book is readable through you who hate the perfect word style. You will find the details here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to provide to you. The writer connected with Integral/Structural Polymer Foams: Technology, Properties and Applications content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the written content but it just different such as it. So , do you even now thinking Integral/Structural Polymer Foams: Technology, Properties and Applications is not loveable to be your top list reading book?

Anthony Alfaro:

The event that you get from Integral/Structural Polymer Foams: Technology, Properties and Applications is the more deep you excavating the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to comprehend but Integral/Structural Polymer Foams: Technology, Properties and Applications giving you enjoyment feeling of reading. The author conveys their point in a number of way that can be understood simply by anyone who read this because the author of this book is well-known enough. This book also makes your personal vocabulary increase well. It is therefore easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having this Integral/Structural Polymer Foams: Technology, Properties and Applications instantly.

Debra Treat:

Reading a book being new life style in this calendar year; every people loves to go through a book. When you read a book you can get a lots of benefit. When you read publications, you can improve your knowledge, because book has a lot of information into it. The information that you will get depend on what sorts of book that you have read. In order to get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this sort of us novel, comics, as well as soon. The Integral/Structural Polymer Foams: Technology, Properties and Applications offer you a new

experience in reading through a book.
