Non-Euclidean Geometry (Mathematical Association of America Textbooks)

H. S. M. Coxeter

Non-Euclidean Geometry (Mathematical Association of America Textbooks) H. S. M. Coxeter

This is a reissue of Professor Coxeter's classic text on non-Euclidean geometry. It begins with a historical introductory chapter, and then devotes three chapters to surveying real projective geometry, and three to elliptic geometry. After this the Euclidean and hyperbolic geometries are built up axiomatically as special cases of a more general 'descriptive geometry'. This is essential reading for anybody with an interest in geometry.

From reader reviews:

Shirley Dildy:

Book is to be different for every grade. Book for children till adult are different content. As you may know that book is very important normally. The book Non-Euclidean Geometry (Mathematical Association of America Textbooks) seemed to be making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The guide Non-Euclidean Geometry (Mathematical Association of America Textbooks) is not only giving you far more new information but also to get your friend when you feel bored. You can spend your own spend time to read your e-book. Try to make relationship with the book Non-Euclidean Geometry (Mathematical Association of America Textbooks). You never sense lose out for everything in the event you read some books.

Geneva Ricks:

As people who live in typically the modest era should be upgrade about what going on or info even knowledge to make these keep up with the era which can be always change and progress. Some of you maybe may update themselves by reading books. It is a good choice to suit your needs but the problems coming to a person is you don't know which one you should start with. This Non-Euclidean Geometry (Mathematical Association of America Textbooks) is our recommendation to help you keep up with the world. Why, since this book serves what you want and need in this era.

Tina Wilson:

The particular book Non-Euclidean Geometry (Mathematical Association of America Textbooks) will bring you to the new experience of reading a book. The author style to clarify the idea is very unique. Should you try to find new book to learn, this book very acceptable to you. The book Non-Euclidean Geometry (Mathematical Association of America Textbooks) is much recommended to you to see. You can also get the e-book from official web site, so you can quickly to read the book.

Alice Winfield:

This Non-Euclidean Geometry (Mathematical Association of America Textbooks) is new way for you who has intense curiosity to look for some information as it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know or perhaps you who still having bit of digest in reading this Non-Euclidean Geometry (Mathematical Association of America Textbooks) can be the light food for you because the information inside that book is easy to get by means of anyone. These books produce itself in the form that is certainly reachable by anyone, that's why I mean in the e-book form. People who think that in guide form make them feel tired even dizzy this guide is the answer. So you cannot find any in reading a publication especially this one. You can find actually looking for. It should be here for you actually. So , don't miss it! Just read this e-book variety for your better life and knowledge.
