Envisioning Dance on Film and Video

Virtually everyone working in dance today uses electronic media technology. *Envisioning Dance on Film and Video* chronicles this 100-year history and gives readers new insight on how dance creatively exploits the art and craft of film and video. In fifty-three essays, choreographers, filmmakers, critics and collaborating artists explore all aspects of the process of rendering a three-dimensional art form in two-dimensional electronic media. Many of these essays are illustrated by ninety-three photographs and a two-hour DVD (40 video excerpts).
