Research-Based Strategies for Improving Outcomes for Targeted Groups of Learners, 1e is an authoritative collection of the best techniques known to work for students with disabilities. A volume unlike any other, it helps practitioners, teacher-educators, and policymakers combat the gap between research and practice by gathering the most meaningful findings regarding special populations in a single source. Written by leading authorities, chapters offer a consistent format that includes definition of strategy, theoretical underpinnings, description, fidelity checklist, and research-based summaries. Sections show how to improve outcomes for a variety of special populations from early childhood, to students with high incidence disabilities, to students with autism spectrum disorders.
