## Continental Margin Sedimentation: From Sediment Transport to Sequence Stratigraphy (Special Publication 37 of the IAS)

This volume on continental margin sedimentation brings together an expert editorial and contributor team to create a state-of-the-art resource. Taking a global perspective, the book spans a range of timescales and content, ranging from how oceans transport particles, to how thick rock sequences are formed on continental margins. Summarizes and integrates our understanding of sedimentary processes and strata associated with fluvial dispersal systems on continental shelves and slopes Explores timescales ranging from particle transport at one extreme, to deep burial at the other Insights are presented for margins in general, and with focus on a tectonically active margin (northern California) and a passive margin (New Jersey), enabling detailed examination of the intricate relationships between a wide suite of sedimentary processes and their preserved stratigraphy Includes observational studies which document the processes and strata found on particular margins, in addition to numerical models and laboratory experimentation, which provide a quantitative basis for extrapolation in time and space of insights about continental-margin sedimentation Provides a research resource for scientists studying modern and ancient margins, and an educational text for advanced students in sedimentology and stratigraphy

### **From reader reviews:**

#### **Margaret Burton:**

The book Continental Margin Sedimentation: From Sediment Transport to Sequence Stratigraphy (Special Publication 37 of the IAS) can give more knowledge and also the precise product information about everything you want. So just why must we leave the great thing like a book Continental Margin Sedimentation: From Sediment Transport to Sequence Stratigraphy (Special Publication 37 of the IAS)? A number of you have a different opinion about book. But one aim which book can give many info for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or data that you take for that, you are able to give for each other; you could share all of these. Book Continental Margin Sedimentation: From Sediment Transport to Sequence Stratigraphy (Special Publication 37 of the IAS) has simple shape but the truth is know: it has great and massive function for you. You can look the enormous world by available and read a guide. So it is very wonderful.

#### **Judith Roemer:**

What do you with regards to book? It is not important along with you? Or just adding material when you want something to explain what the ones you have problem? How about your spare time? Or are you busy individual? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Everyone has many questions above. They should answer that question because just their can do this. It said that about book. Book is familiar on every person. Yes, it is suitable. Because start from on jardín de infancia until university need this specific Continental Margin Sedimentation: From Sediment Transport to Sequence Stratigraphy (Special Publication 37 of the IAS) to read.

#### **Kimberley Bailey:**

Now a day people who Living in the era exactly where everything reachable by talk with the internet and the resources in it can be true or not demand people to be aware of each information they get. How people have to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Reading a book can help men and women out of this uncertainty Information especially this Continental Margin Sedimentation: From Sediment Transport to Sequence Stratigraphy (Special Publication 37 of the IAS) book because this book offers you rich data and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it you may already know.

#### **Beverly Thomas:**

Playing with family in a very park, coming to see the sea world or hanging out with buddies is thing that usually you will have done when you have spare time, and then why you don't try point that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Continental Margin Sedimentation:

From Sediment Transport to Sequence Stratigraphy (Special Publication 37 of the IAS), you may enjoy both. It is good combination right, you still desire to miss it? What kind of hang-out type is it? Oh seriously its mind hangout fellas. What? Still don't obtain it, oh come on its named reading friends.
